## CATAMARANS

Learn more

JAN - FEB 2022 | NUMBER 36

### Le mot du Capitaine

The entire Aventura team wishes you a wonderful year 2022! A year full of health, happiness and sailing!

The shipyard is undergoing a lot of changes in the new year. The teams are constantly being strengthened. We have also acquired new equipment and 2 new buildings will be integrated. All in all, an increase of more than 3000m2 of construction space dedicated to the Aventura 37 and 14 Power.

Finally, we have a big surprise in store for 2022. Perhaps a new Aventura on the horizon?

- Have a nice trip

Aventura 37

Aventura 14 POWER

Aventura Catamarans has been very successful with its two new catamarans the Aventura 37 and the Aventura 14 POWER.

Since the Cannes Festival we have sold more than 45 Aventura 37 and more than ten Aventura 14 POWER.

These two new products have both been noticed by the press. The **Aventura 37** has been selected as one of the **top 5 boats of 2021** by **Bateaux.com** and the **Aventura 14 POWER** is competing for the title of "Boat of the Year" by **Multihull magazine**.

Perfectly balanced between sensations and relaxation, our catamarans have seduced you thanks to the very spacious and bright living areas that offer all the comfort for your cruises.

If you too have been charmed by our **Aventura 14 POWER**, vote for us and make our catamaran the Multihull of the Year!

To vote, nothing could be simpler: go to [the website](#) dedicated to this election from February 16th (opening day of the Miami Boat Show), until April 17th 2022. The official results of the election will be announced during the International Multihull Boat Show in La Grande Motte, France.

### NEWS FROM THE YARD

#### The team is growing

At the beginning of 2022 we recruited an industrial director and more than 80 positions are to be filled to reach 200 employees this year.

#### Major investments in the new year

A 30 ton capacity boat-lift will soon be introduced to the yard. This new motorised machine aims to reduce the time it takes to move yachts, optimise their positioning in the shipyard and increase the efficiency of launching; thanks to this project, the Boat-lift makes the shipyard independent for its handling and launching.

#### New website

By March 2022 we will have a second operational production site of 12,000m2 of which 4,200m2 will be covered and dedicated exclusively to our sailing catamarans.

In 2023/2024 we will increase the surface of our production area by more than 4,000m2, depending on the evolution phases the site will soon reach 8200m2 covered.

#### Boat shows

We will participate in the La Grande Motte show from 20 to 24 April 2021 with our Aventura 37 and Aventura 14 Power.

We will also be at the next edition of the Cannes 2022 show.

We look forward to seeing you there!

Don't hesitate to contact us by mail to visit our boats!

#### A major surprise this year ...

Aventura Catamarans will unveil in a few months a new catamaran, still as inventive as ever and still designed by Samer LASTA.

Will it be a sailboat? a motorboat? bigger? smaller? more voluminous?

A photo that might put you on the right track!

Aventura Catamarans est une marque du chantier naval STGL.
